Server Startup:

1. Install Xampp
2. Start Xampp and make sure SQL and Apache Server have been started
3. If you're using a Mac make sure localhost:8080 has been enabled. Also make sure your data volume has been mounted.
4. Place MillMadness folder in nfs://192.168.64.2/opt/lampp/htdocs/
5. Htdocs is where all website files are being hosted.
6. Go to your web browser and type in localhost:8080/millmadness to be taken to the index directory.
7. Go to localhost:8080/dashboard/ and click import database where you will import the millmad.sql database.
8. To use Manager Functions, go to millmad database, rlogin, and you can find the username and passwords there.
